Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "such" is vague. It is suggested to use "the".

In claim 3, line 1, "in" is vague. It is suggested to use "for". In the last line "sizes" are vague. Does this refer to the actual size or the values?

In claim 5, "charged up" makes the claim incomplete since the claim has not set forth any structure to charge the capacitors.

In claims 6 and 7, "serves" is vague since it is unclear how they are connected or what elements are provided to accomplish the function of serving as a reserve.

In claim 8, "designed to be" is vague since the claim is not specifically stating that they are connected in that way and it is unclear whether this is a structural or functional limitation.

In claim 9, line 1, "the" should be deleted. In addition, the claim should be canceled since it is a substantial duplicate of claim 1 and does not further limit claim 1.

In claim 10, "pacemakers, defibrillators, and cardioverters" is vague since only one device has been provided but each item in the group is plural.

In claim 11, "a separate energy storage device" is inferentially included and needs to be positively recited.

In claim 12, "such" is vague.

Art Unit: 3762

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-9, 11, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fryer (4186749). Fryer shows an implantable device (abstract) having a telemetry device (all of figure 2) exchanging data with an external apparatus for the power supplied from the external apparatus. The telemetry device comprising a receiving device (19) having buffer capacitors/energy storage devices (66, 67, and 58) and a transmitting device (23) having buffer capacitors/energy storage devices (83 and the 560 pF). The broad elements of the claims are met by the reference.

Claims 1, 2, 4, and 8-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hepp (4172459).

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection necessitated by amendment. The applicants argument that Fryer does not contain a power supply is not persuasive since the applicant is not claiming a power supply, only an energy storage means/device. A capacitor is an energy storage means/device. The applicants argument that Fryer does not disclose a telemetry receiver is not persuasive since the applicant is not claiming a telemetry receiver but a telemetry device having a receiving device (which Fryer contains). Finally, no claims have been indicated as allowable

Application/Control Number: 09/603,812

Art Unit: 3762

since several 112 second paragraph rejections remain and it is unclear what structure is being claimed or provided in those claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In 100 event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George R Evanisko whose telephone number is 703 308-2612.

The examiner can normally be reached on M-F 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 703 308-5181. The fax phone numbers for the organization where this application or proceeding is assigned are 703 306-4520 for regular communications and 703 306-4520 for After Final communications.

Attachment for PTO-948 (Rev. 03/01. or earlier) 6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein Identifying indicia, if provided, should include the title of the invention inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1 136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Dransperson, MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a)

Failure to take corrective action within the set period will result in ABANDONMENT of the application.
